Evan Tarrh

FULLSTACK ENGINEER & UI SPECIALIST

EVANTARRH@GMAIL.COM · (339) 970-1613 · WWW.EVAN.LAND

EDUCATION

Columbia University   February 2017

- Major in Computer Science, Applications track. GPA: 3.72/4
- Relevant coursework: Databases, Analysis of Algorithms, Compilers, Natural Language Processing, Design and Agile Project Management, Web Development I & II, Advanced Programming in C and C++

EXPERIENCE

Fitbit FITBIT.COM   Summer 2016

- Created monitoring service & web interface to determine whether a user's email & password had been leaked on the Internet and increase account security for affected users
- Built out infrastructure to address longstanding systemic security risks in checkout process

Everlane EVERLANE.COM   Summer 2015

- Migrated mobile website from Ruby on Rails to ChaplinJS, implemented A/B tests (e.g. mobile homepage redesign) that increased conversion rates and average order value, and developed high-visibility features for product releases

Teaching Assistant III   Sept. 2014 – Dec. 2015

- One of a small number of undergraduate CS students who earned the TAIII title, assisting in the organization of large classes (Introduction to CS; Data Structures in Java).

PROJECTS

From Zero To Website EVAN.LAND/JADE   January 2016

- Designed & taught week-long beginner web development curriculum to 16 first-year Columbia and Barnard students.

BruhzzFeed BRUHHH.CO   HackNY Fall 2015

- Tag popular images from Imgur using the Clarifai API, then use NLTK to generate titles and create Buzzfeed-style listicles.

Density DENSITY.ADICU.COM   Spring 2015

- Turn real-time router data from Columbia into information about how crowded campus study spaces are.

TECHNICAL

- Languages: Python, Javascript, Java, HTML/CSS
- Other tools: Flask, Angular, jQuery, Sass, Git, Unix

BONUS

- Award-winning jazz pianist and composer, aspiring electronic musician
- Competitive Super Smash Bros. player
